+75K ADVANCED Engine Treatment
Formulated for Higher Mileage Engines

**TM5366 Throttle Muscle +75K Engine Treatment
for vehicles over 75,000 miles**

In early 2012, the average car on the road was about 11 years old. With the average driver putting on 12-15,000 miles per year, the average vehicle has over 130,000 miles on it! With cars being made better and better each year, the need to trade in a car just isn't as necessary as it once was. For this reason, many of the top oil companies have produced oils specially formulated for higher mileage vehicles.

Throttle Muscle +75K Engine Treatment is specially designed to compliment today's high mileage oils. Our formula offers a unique blend of the special low-friction qualities of PTFE in a high mileage base oil. Our formulation helps extend engine life in vehicles over 75,000 miles. +75K Engine Treatment contains seal conditioners to help prevent oil leaks and reduce oil consumption. Throttle Muscle +75K Engine Treatment:

- Unique formulation helps extend engine life
- Protection for vehicles with more than 75,000 miles
- Formulated with seal conditioner to help prevent leaks and reduce oil consumption
- Helps combat sludge and reduce wear in older engines
- Contains friction reducing PTFE
- Compatible with all types of motor oil and can be used in gas or diesel engines
- One super concentrated 16Oz bottle treats up to 6 quarts of oil
