

# TREAT YOUR ENGINE RIGHT

## THROTTLE MUSCLE Fuel System

**Cleaning Service can restore lost horsepower and maximize fuel economy.**

**Not sure if it's time?**

The Throttle Muscle Combustion Performance Test (CPT), lets you know your engine's combustion performance level, which may indicate that a Fuel System Cleaning Service is advisable.

## **CPT** Combustion Performance Test at **THROTTLE MUSCLE**

# What's your CPT score?

Our Combustion Performance Test rates the health of your engine performance. Your Score tells you if your vehicle could benefit from a Fuel System Cleaning Service.

### **Red means stop waiting.**

If your CPT score is in the red zone, your engine performance is not optimal. Varnish and carbon buildup may have your engine running inefficiently. A Fuel System Cleaning Service is just one step to helping you get back on track.

### **Yellow means prevent.**

Varnish and carbon deposits are affecting your engine performance, and your cylinder combustion is not ideal. Talk with your Throttle Muscle technician about scheduling a Fuel System Cleaning Service to Stop losing fuel economy and horsepower due to engine buildup.

### **Green means clean.**

All of your cylinders are firing smoothly. Check your CPT score on your next visit to make sure your engine continues operating the way it should.
